```
class Empleado {
    public double salario;
    public Empleado(double salario) {
        this.salario = salario;
    }
    public  double getSalario() {
        return salario;
    }
}
```

```
class Empleado {
    public double salario;
    public Empleado(double salario) {
        this.salario = salario;
    }
    public  double getSalario() {
        return salario;
    }
}
```
